PROFESSIONAL SUMMARY

Agentic AI Developer, building intelligent systems that combine LLMs, RAG, and multi-agent workflows to solve real-world problems. Focused on creating proactive, context-aware AI that goes beyond predictions to decision-making. Fast learner with a strong interest in scalable AI systems.

EDUCATION

Bachelor of Technology (Artificial intelligence) 2024 - 2028
Newton School Of Technology, Rishihood University Grade: 7.826/10.0

Intermediate (Class XII) 2022 - 2023
Evergreen Public School, New Delhi Grade: 71.4%

Matriculation (Class X) 2020 - 2021
Modern Public School, Bhiwadi Grade: 91.8%

INTERNSHIPS

Operations and Tech Head December 2025 - Present
Lithience Energy *Ghaziabad*

- Helped a new business owner to identify operational bottlenecks and develop a custom web application tailored to business requirements, improving workflow efficiency and management processes.
- Streamlined day-to-day operations by addressing key pain points and optimizing existing business workflows through technology-driven solutions.
- Contributed to scaling weekly revenue retention from Rs.5–8K to Rs.30–40K through improved operational management and process optimization.

PROJECTS

Ava (Github) (Demo) April 2026

- **Description:** A dynamic, LLM-powered wearable health advisor built on a 3-agent architecture, AVA continuously monitors real-time vitals, learns personal baselines, and detects long-term health patterns. It combines two RAG systems with adaptive intelligence to build a deep, evolving model of the user enabling proactive, personalized guidance that feels like a highly attentive health companion who knows when to intervene and when to stay silent.
  Tech Stack: Python, LangGraph, LangChain, Groq (LLaMA 3.1 8B / 70B), ChromaDB (Vector DB), Sentence-Transformers, Streamlit, NumPy, RAG Pipelines, Multi-Agent Systems

RevFlowAI (Github) (Demo) March 2026

- **Tech Stack:** Python, FastAPI, React.js, Tailwind CSS, Supabase, PostgreSQL, pgvector, Groq (Llama-3.1), RAG, FastEmbed, pdfplumber, Vite.
- **Description:** RevFlow-Ai is an autonomous AI agent for Accounts Receivable automation. It parses unstructured PDF invoices using 3-stage extraction and reconciles them against Purchase Orders via fuzzy semantic matching. Using RAG and Groq, it autonomously drafts context-aware vendor communications and manages an escalating collections pipeline, ensuring full transparency through immutable audit logs.

CustomerChurn Prediction and Agentic Retention Strategy (Github) (Demo) February 2026

- **Tech Stack:** scikit-learn(Logistic Regression, Decision Tree), Groq API (LLaMA 3.3 70B), LangGraph, LangChain, FAISS, HuggingFace Embeddings (all-MiniLM-L6-v2), pandas, NumPy, Streamlit, Plotly, Hugging Face Spaces, Google Colab, joblib, RAG.
- **Description:** ChurnGuard AI predicts customer churn using classical ML and autonomously generates personalized retention strategies through a RAG-powered agentic workflow. It analyzes risk, retrieves relevant strategies, and produces structured action plans via an interactive dashboard.

LinguaLink (Github) (Demo) November 2025

- **Tech Stack:** Html, Vanilla CSS, JavaScript, React.js, Next.js, Express.js, Node.js, Prisma ORM, MongoDb, JWT-Auth, Web-Sockets, Google Gemini API.
- **Description**: LinguaLink enables users to chat in their preferred language, automatically translating messages and UI labels using Gemini AI. This allows two users speaking different languages to communicate effortlessly, each viewing the chat entirely in their own language.

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, SQL, TypeScript
Courses: Data Structure
Soft Skill: Communication Skills, Creativity, Critical Thinking, Decision-making, Interpersonal communication, People skills, Presentation Skills, Problem-Solving, Public speaking, Responsibility, Teamwork, Verbal/nonverbal communication, Written communication
Databases & Data Tools: Excel, Firebase, MongoDB, MySQL, NoSQL, PostgreSQL, Spreadsheet, Supabase, Tableau
AI / ML: GenAI, Generative AI, LangChain, LangGraph, LLM, Machine Learning, OpenAI API
APIs & Testing: API, API testing, OAuth 2.0, Postman, Unit Testing
Cloud & DevOps: Git and Github
Domain & Business Skills: Figma, Product Management, UI/UX
Frameworks & Libraries: Express JS, Matplotlib, Next.js, Next JS, Node.js, NumPy, Pandas, Prisma ORM, React

EXTRA-CURRICULAR ACTIVITIES

- Appointed as Director in Events Department in our college's cultural fest DAMRU.
- Appointed as Developer in Logistics Department in our college's Tech fest NEUTRON.
- Events Team Co-Lead at Mio-Emocione, an emotional cafe event of our psychology department.
- Volleyball Player.
