PROFESSIONAL SUMMARY

Agentic AI Developer, building intelligent systems that combine LLMs, RAG, and multi-agent workflows to solve real-world problems. Focused on creating proactive, context-aware AI that goes beyond predictions to decision-making. Fast learner with a strong interest in scalable AI systems.

EDUCATION

Bachelor of Technology (Artificial intelligence) 2024 - 2028
Newton School Of Technology, Rishihood University Grade: 7.826/10.0

Intermediate (Class XII) 2022 - 2023
Evergreen Public School, New Delhi Grade: 71.4%

Matriculation (Class X) 2020 - 2021
Modern Public School, Bhiwadi Grade: 91.8%

INTERNSHIPS

Operations and Tech Head December 2025 - Present
Lithience Energy *Ghaziabad*

Helped a new business owner with operations and management issues via building a web app tailored to business's needs, pain points and loopholes in the current flow of operations.

PROJECTS

Ava (Github) (Demo) April 2026

- **Description:** A dynamic, LLM-powered wearable health advisor built on a 3-agent architecture, AVA continuously monitors real-time vitals, learns personal baselines, and detects long-term health patterns. It combines two RAG systems with adaptive intelligence to build a deep, evolving model of the user enabling proactive, personalized guidance that feels like a highly attentive health companion who knows when to intervene and when to stay silent.
  Tech Stack: Python, LangGraph, LangChain, Groq (LLaMA 3.1 8B / 70B), ChromaDB (Vector DB), Sentence-Transformers, Streamlit, NumPy, RAG Pipelines, Multi-Agent Systems

CustomerChurn Prediction and Agentic Retention Strategy (Github) (Demo) February 2026

- **Tech Stack:** scikit-learn(Logistic Regression, Decision Tree), Groq API (LLaMA 3.3 70B), LangGraph, LangChain, FAISS, HuggingFace Embeddings (all-MiniLM-L6-v2), pandas, NumPy, Streamlit, Plotly, Hugging Face Spaces, Google Colab, joblib, RAG.
- **Description:** ChurnGuard AI predicts customer churn using classical ML and autonomously generates personalized retention strategies through a RAG-powered agentic workflow. It analyzes risk, retrieves relevant strategies, and produces structured action plans via an interactive dashboard.

SKILLS

Computer Languages: Machine Learning, TypeScript, NoSQL, HTML, CSS, JavaScript, Python, SQL
Data Tools: PostgreSQL, NumPy
Software Packages: Pandas, Matplotlib, Figma, Next.js, Next JS, Prisma ORM, React, Node.js, Excel, Express JS, MySQL, MongoDB
Additional Courses: Data Structure
Soft Skills: Interpersonal communication, Public speaking, Verbal/nonverbal communication, Written communication, Decision-making, Creativity, Teamwork, Critical Thinking, Responsibility, People skills, Presentation Skills, Communication Skills
Others: Git and Github, Firebase, Unit Testing, Postman, Spreadsheet, UI/UX, Product Management, Problem-Solving, LangChain, OpenAI API, API testing, GenAI, LangGraph, Supabase, OAuth 2.0, Tableau, LLM, Generative AI

EXTRA-CURRICULAR ACTIVITIES

- Appointed as Director in Events Department in our college's cultural fest DAMRU.
- Appointed as Developer in Logistics Department in our college's Tech fest NEUTRON.
- Events Team Co-Lead at Mio-Emocione, an emotional cafe event of our psychology department.
- Volleyball Player.
